THE BEST REMEDY

Diseases of the Throat and Lungs.

In diseases of the pul-mousty organs a safe and reliable remedy is invaluable. Aven's Chemy Pecroan- is such a remedy, and no othersoemisently recr-AYER'S such a remedy, and no other soemheathy mer-its the confidence of the public. It is a sci-certific combination of the medicinal princi-ples and curative vir-tues of the finest drugs, schemically united, of such power as to insure, the greatest possible CHERRY

the greatest possible and the control of the process of the foundation of all pulmonary diseases, affording prompt relief and spid cures, and is adapted to patients of any age or either sex. Being very palatable, the youngest children take it readily. In seninary Coughs, Colds, Sore Throat, Bronchills, Influenza, Clorgyman's Sore Throat, Asthma, Croup, and Catarrh, the effects of Aven's Caunux Procionat are magical, and multibudes are annually preserved from serious illuses by its timely and faithful use. It should be kept at hand in every bousehold for the protection it afforts in sudden attacks. In Whooping cough and Consumption there is no other remody so efficacious, scotling, and helpful.

Low prices are inducements to try some of the many mixtures, or syrups, made of cheap and ineffective ingredients, now offered, which as they contain no curative qualities, can afford only temporary relief, and are sure to deceive and disappoint the patient. Diseases of the throat and lungs demand active and effective treatment; and it is dangerous experimenting with unknown and cheap medicines, from the great liability that these diseases may, while so trified with, become deeply seated or incurable. Use Aven's Curany Prevonat, and you may confidently expect the best results. It is a standard medical preparation, of known and acknowledged curative power, and is as chemp as its careful preparation and fine ingredients will allow. Eminent physicians, knowing its composition, prescribe it in their practice. The test of half a century has proven its absolute certainty to cure all pulmonary complaints not already beyond the reach of human aid.
